Ecosse Best Boy

£24.95/1m pair ★★★★★

Ecosse's 'first upgrade' cable is relatively thin and grey, with oxygen-free copper, a foam insulator, an aluminium/mylar sheet and copper braid. While Best Boy will be bettered by much more expensive cables, it delivers a good powerful bass – provided your source can provide it. It also has an attractively open and sparkling treble, by the standards of entry-level cables, with good clarity and character.
